For more than two decades, SharkBite has been at the forefront of innovating solutions that help the plumbing trade work more productively and efficiently. As the leader of push-to-connect plumbing, we create solutions that works across a wide range of applications, including service and repair, remodel, repiping and new construction.

One complete solution

Reliance Worldwide Corporation® (RWC) is a market leader and manufacturer of water control systems and plumbing solutions for residential, commercial and industrial applications. Established in 1949, the RWC portfolio includes industry-leading brands: SharkBite® Push-to-Connect plumbing solutions; HoldRite® engineered plumbing and mechanical solutions; Cash Acme® control valves and John Guest® fittings and fluid dispense products. Engineered for quality and efficiency, the portfolio of products from the RWC brands work together to create an end-to-end solution from meter to fixture, floor to ceiling.

Push-to-connect system

Push-to-connect plumbing solutions for residential and commercial applications.

Engineered solutions

Secondary pipe supports, acoustic noise and vibration plumbing solutions, firestop systems, DWV testing solutions and water heater accessories.

Water control valves

Pressure regulating valves, thermostatic mixing valves and temperature & pressure relief valves for safeguarding water systems.

Specialist industry solutions

Push-to-connect solutions for specialist industries and OEMs.

Redefining efficiency

For more than 20 years and with over 250 million fittings installed, SharkBite has been at the forefront of innovating solutions for helping the plumbing trade improve efficiency with enhanced jobsite performance. Being a leader through continuous innovation and providing solutions that address the challenges that plumbing professionals face every day is who we are.

Whether you are repairing a water line, installing a water heater, remodeling a home or plumbing a system in a new construction job, SharkBite provides proven solutions that save time, reduce cost and have the versatility to overcome the most difficult situations.

The mark of quality

Speed and ease of use

Push-to-connect design enables efficient install. No special tools, glue or solder required, which means more productivity and lower risk of installation errors.

Quality

Field-tested with more than 1.5 million connections every week. SharkBite owns its manufacturing process and backs its products with a 25-year system warranty.

Versatility

SharkBite brass push fittings are compatible with PEX, copper, CPVC, HDPE and PE-RT pipe. Solutions are also available for PVC and polybutylene pipe.

Code Approved

Approved for underground and behind-the-wall applications with no access panels. Wrapping required when burying brass fittings underground.

SharkBite plumbing system

How to install SharkBite push-to-connect products.

Cut
Cut the pipe square removing rough edges and debris. Mark the pipe to the correct insertion depth.

Push
Push pipe and fitting together up to the depth mark.

Done

Disconnect
Using the disconnect clip, fittings can be easily changed, removed and reused.

Slip Coupling (only suitable for copper and CPVC)

Slip couplings are the most efficient way to repair a burst pipe or leak. Slip fittings simply repair by doing the job that two couplings and extra pipe used to do. Only one end of the coupling has a stop, allowing the opposite end to slide freely over the end of a pipe. The fittings can then be released with a disconnect tool and slid back onto the other end of the pipe for a successful connection and leak repair.

EvoPEX Fittings

Designed for new construction and larger renovation projects, SharkBite EvoPEX push-to-connect fittings and SharkBite PEX pipe deliver the ability to plumb an entire potable water system without the need for special tools. This revolutionary system provides a faster, safer and more reliable installation for long-term use and satisfaction. It extends beyond the traditional pipe and fittings solutions to include fittings, PEX pipe, valves, supply stops and other accessories.

Keep to schedule

No special tools, crimping, glue or solder to plumb an entire home, optimizing install time and efficiency. Fittings can be securely rotated after installation for quick alignment.

Mitigate risk

The system's ease of installation reduces the risk of install errors, which minimizes potential leaks. A green visual indicator provides instant assurance that a secure and permanent connection has been made.

For use on SharkBite PEX pipe only. Not compatible with copper or CPVC pipe.

PEX Pipe

The benefits of SharkBite PEX

SharkBite PEX pipe is a cost-effective piping solution approved for use in both hot and cold plumbing installations. Compared to rigid pipe, PEX pipe is faster to install and its flexibility to bend around corners allows for longer runs and fewer connections - reducing cost, time and potential leak points. It is also a freeze resistant pipe that can expand slightly if frozen and contract when thawed. SharkBite PEX pipe offers the highest rating for chlorine resistance and a six-month UV resistance, the highest available. It is approved for water service lines and burial applications, including being buried in concrete. With more than 850 million feet of PEX pipe installed in North America, SharkBite PEX pipe is proven and guaranteed.

Discover the flexibility and benefits of SharkBite PEX Pipe

Cost Savings and Flexibility

Flexibility to bend around corners allowing for longer runs with fewer connections, which saves cost, allows for faster installations and reduces potential leak points.

Freeze Resistant

PEX systems are less susceptible to burst in freezing conditions due to the pipe's ability to expand and contract.

Chlorine and UV Resistance

SharkBite PEX has a 5306 rating, giving it a UV rating of 6 months. It also has the highest chlorine resistance rating.

Health and Safety

No torches, glue or solvents required for installation, which keeps potentially dangerous chemicals out of the potable water supply.

Proven and Guaranteed

SharkBite PEX pipe has been around for more than 35 years with over 12 billion feet of pipe installed worldwide.

Oxygen Barrier PEX Pipe

Oxygen Barrier PEX Pipe (orange coils)

Use for radiant floor and hydronic heating applications. The oxygen diffusion barrier is applied to the exterior and limits oxygen permeation through the pipe wall in hydronic heating applications. This prevents corrosion of ferrous metal parts in the heating system.

Limited Warranty

SharkBite, Cash Acme, and HoldRite Products

WHAT DOES THIS WARRANTY COVER?

Subject to conditions outlined in this statement, RWC (in the USA, Reliance Worldwide Corporation and in Canada, Reliance Worldwide Corporation (Canada) Inc.) warrants to owners of real property in the United States and Canada that SharkBite and Cash Acme products, when used and installed in accordance with the requirements set forth, shall be free from defects in material and workmanship for the applicable Warranty Period. This Limited Warranty is in effect for installations made after January 1, 2018 and is applicable to products installed in the country in which they were purchased.

Proof of purchase is required to validate the Warranty Period. If proof of purchase is not available, the Warranty Period commencement shall default to the date of manufacture for each product. If the product suspected of a defect does not have a clear date of manufacture on it, a proof of purchase will be required.

WHAT ARE THE CONDITIONS OF THIS WARRANTY?

1. All products must be installed in accordance with all then applicable codes, good plumbing practice, in accordance with any local, state, provincial or federal requirements, and installed in a potable water or radiant heating application unless a non-potable water service is specifically allowed for in the pertinent product literature.
2. The installer must use construction techniques compliant with then applicable codes to install the product and use the product within the design parameters specified in any installation guidelines and technical notes for the applicable system. This shall include field pressure testing prior to concealing with concrete or by other means and wrapping any brass fitting when buried. Failure to install RWC products according to manufacturer's installation instruction will void all applicable warranties and may result in severe water damage.
3. Products must at all times be used in a manner consistent with their intended use and be used in installations and environments acceptable to their material and design specifications, including not being installed in a system that may operate at temperatures or at pressures that exceed the approved ratings which can be found on the product, packaging or installation instructions.
4. Additional product specific conditions of this Limited Warranty and the Warranty Period are documented in the section entitled, **How long does the limited warranty coverage last and what other specific conditions exist for each product?**
5. Without limiting the foregoing, this Limited Warranty does not apply and you do not have a right of reimbursement if the product failure or resulting damage is caused by: (a) evidence of tampering, mishandling, neglect, abuse, accidental damage, freeze damage (it is expressly understood that failure as a result of any freezing fluids within the pipes does not constitute a defect in material or workmanship and shall not be covered by this warranty) or unauthorized modifications or repairs that cause

damage to warranted products; (b) exposure to harmful, unauthorized, or unanticipated chemicals or substances or corrosive water conditions; (c) exposure to ultraviolet light; (d) faulty installation including failure to follow proper burial instructions; (e) damage from abnormal operating conditions including exposure pressures and temperatures beyond the specified operating range; (f) failure to properly test and pass common testing methods (including pressure testing) after the installation and before the product or system is put in service; (g) components not manufactured or sold by RWC; or (h) acts of nature such as earthquakes, fire, flood or lightning.

6. Although RWC provides a plumbing system to facilitate a complete installation, other manufacturers pipe and/or fittings may be installed in any given installation provided manufacturing of the pipe and/or fittings demonstrates compliance with the applicable ASTM/CSA standards, and the product has been certified by a recognized third-party testing agency. The RWC product in the given installation will continue to be covered under this Limited Warranty although limits on Warranty Period may apply. RWC will be responsible only for proven defects in material or workmanship in RWC products. Problems in products manufactured by another company should be reported to that manufacturer.

HOW DO YOU GET SERVICE?

In order to be eligible for service under this Limited Warranty you must return the defective product to RWC for inspection and testing within thirty (30) days after detection of alleged failure or defect occurring within applicable Warranty Period (with shipping charges prepaid) to the original place of purchase. If the alleged defect involves a connection or joint with a RWC product, the fitting must be returned with a section of the pipe still inserted. You must include the model number of the product (if available), the original date of purchase, proof of purchase and the nature of the alleged product failure or defect. Products returned without shipping charges prepaid will be refused. For questions or inquiries, in the U.S. call 1(877)700-4242 and in Canada 1(888)820-0120.

WHAT WILL RWC DO?

If, after inspection, we find that a product covered by this Limited Warranty has failed due to a defect in material or workmanship during the specified Warranty Period, we will repair or replace, at our sole option, free of charge, the defective product during normal working hours and through a place of business as determined by RWC.

Notwithstanding anything to the contrary in this Limited Warranty, if RWC determines that any damages to the real property in which a defective product was installed were the direct result of a leak or failure caused by a defect in material or workmanship in any RWC product covered by this Limited Warranty and occurring within the first ten years after date of purchase or during the applicable Warranty Period, whichever is shorter, and if reasonable steps were taken to promptly limit or stop the effects of such leak or failure as soon as it was discovered, then RWC will reimburse the property owner for the reasonable costs of repairing

or replacing such damaged real property to include flooring, drywall and painting and other real property damaged by the leak directly caused by the allegedly defective RWC product when the RWC SharkBite Connection System product was installed by a licensed professional plumbing contractor. Except as specified above or otherwise specifically authorized in writing by RWC, RWC shall not pay for any costs or expenses for transportation, relocation, labor, repairs or any other work associated with removing and/or returning failed or defective products or installing replacement products.

This shall constitute the sole and exclusive remedy for any defective product.

WHAT DOES THIS LIMITED WARRANTY NOT COVER?

RWC shall not be responsible for any other incidental, indirect, contingent, special or consequential damages, including without limitation, economic loss, lost profits or the cost of repairing or replacing other property which is damaged if these warranted products do not work properly, other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, adverse chemical environments, or any other circumstances over which RWC has no control. This limitation applies even if RWC could have foreseen or has been advised of the possibility of these damages. This Limited Warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product. Any remaining warranty coverage may not be assigned or transferred after the period ending ten years following the installation. RWC does not guarantee or in any way warrant the integrity or workmanship of the contractor/installer.

MISCELLANEOUS

Some States/Provinces do not allow limitations on how long an implied warranty lasts, and some States/Provinces do not allow the exclusion or limitation of incidental or consequential damages. Therefore, the above limitations may not apply to you. This Limited Warranty gives you specific legal rights, and you may have other rights that vary from State/Province to State/Province. You should consult applicable State/Provincial laws to determine your rights.

So far as is consistent with applicable state/provincial/federal law, the express warranty set forth herein is the only warranty given by rwc with respect to the SharkBite® and CashAcme® products and RWC makes no other warranties, expressed or implied, and hereby specifically disclaims all other warranties, expressed or implied, including but not limited to the implied warranties of merchantability and fitness for a particular purpose.

This Limited Warranty and any claims arising from breach of contract, breach of warranty, tort, or any other claim arising from sale or use of RWC's products shall be governed and construed under the laws of the State of Georgia. No action on the part of RWC under this Limited Warranty shall be construed as an admission of liability of that the product is not fit for its intended use.
