

Square to Round Register Box

Hercules Industries provides an efficient Square to Round connection piece that is suitable for most HVAC applications. Connects insulated flexible duct or round pipe to a flat surface. Can be used to route air from any side of the plenum or a rectangular duct run. Fits most HVAC types for universal application and our manufacturing style with a tacky seal helps create a secure, airtight seal.

- All gauges and reinforcements are in compliance with 2005 SMACNA standards for duct fabrication
